Summary of My Capstone Project

My research question is “How can students benefit from Chinese immersion schools?”

My capstone project is a website. My website focus on this question with explanations from my literature review. The homepage of my website has a menu bar to easily navigate each page.

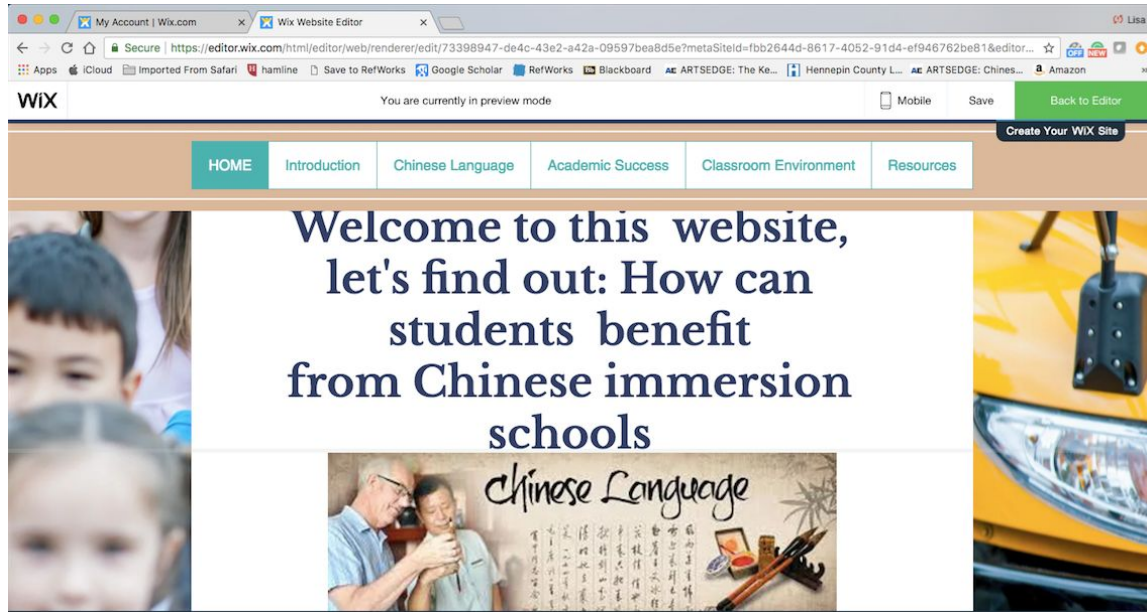

There are six major catalogs with drop down labels in the menu. Each label in the menu is a new topic with links on the label to easily take user to a new page just focus on the information they are interested. The first catalog is the introduction part, there are three labels in the drop down menu: the reason to learn Chinese, the definition of immersion, and an introduction about Chinese immersion schools in Minnesota. The second catalog is about how can Chinese immersion schools encourage better Chinese language skills. The third catalog is about how Chinese immersion school improves students’ academic success. The fourth catalog is about why Chinese immersion schools can provide effective classroom learning environments. The fifth catalog including useful resources talk about why other people choose Chinese immersion schools. The sixth catalog is a comment area for people to ask questions and leave comments.

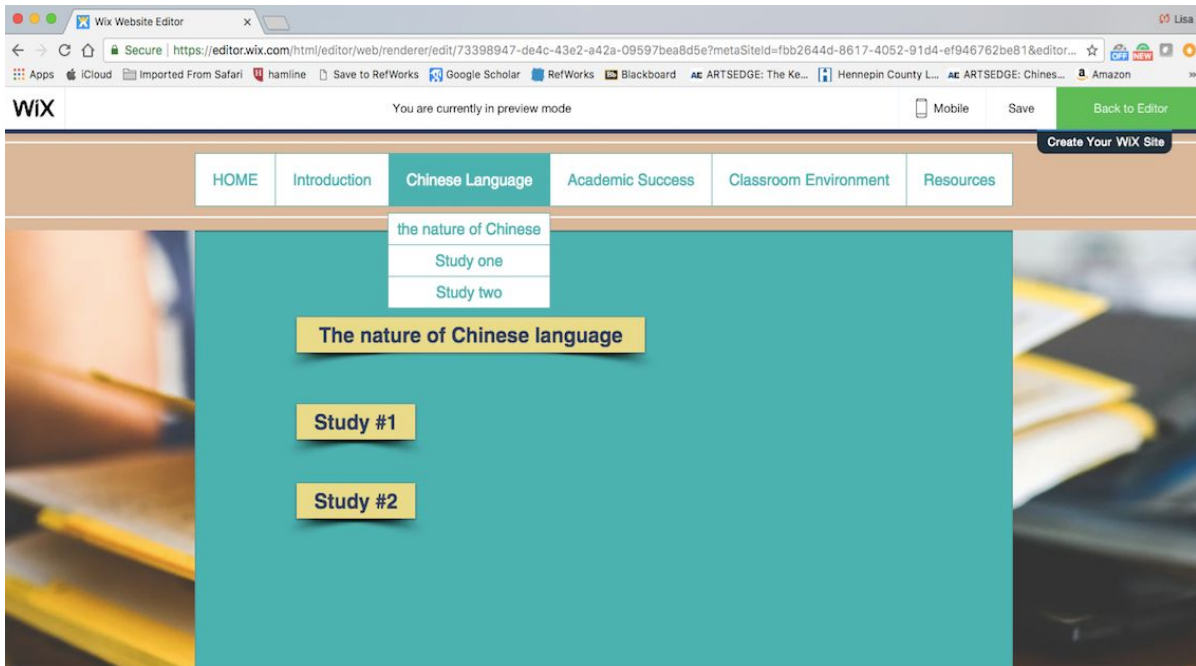

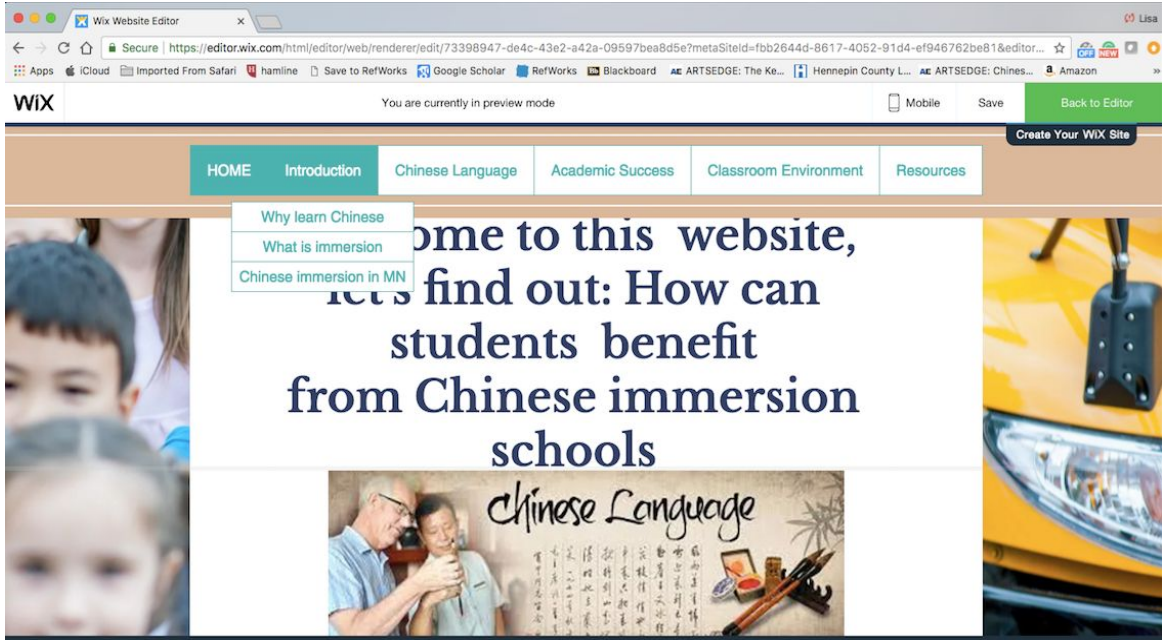

My target audience is parents who are interested in Chinese language and who want to send their children to Chinese immersion schools. With the rapid economic development of China, more and more people realized the importance of learning Chinese and understand Chinese culture. But, Chinese is also known as one of the hardest languages in the world, therefore these parents are trying to find out the best way for their kids to learn it. My website provides the benefit of Chinese immersion schools from Chinese language skills, students’

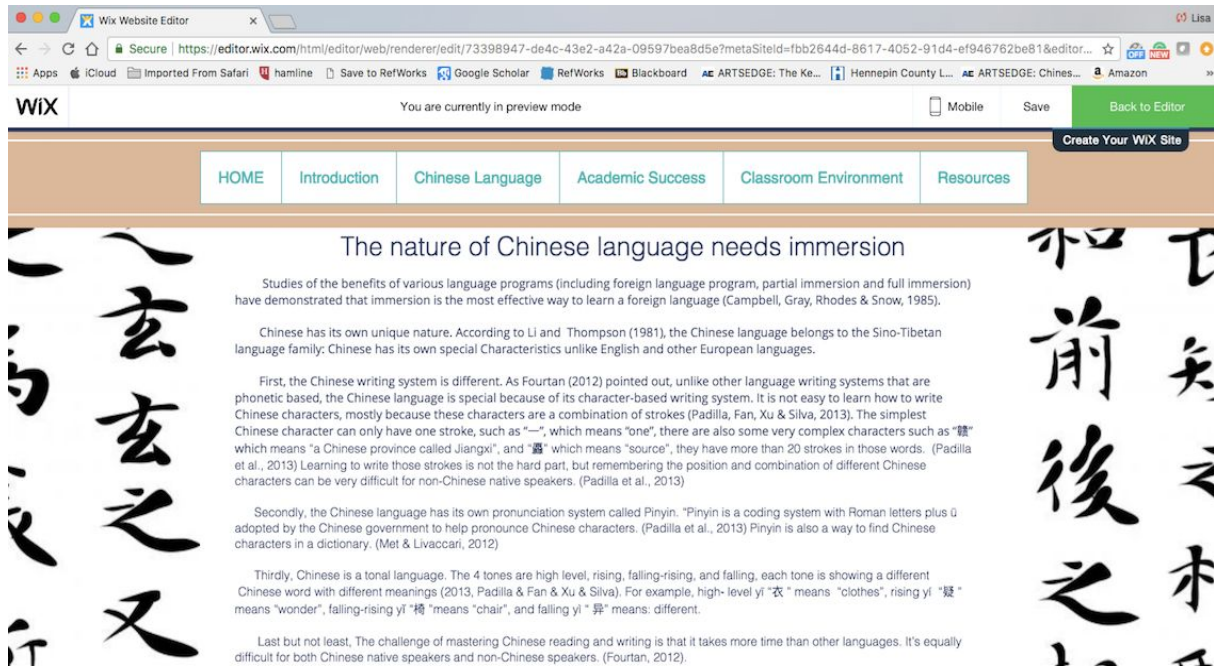

academic success and classroom learning environments, all information meet the needs of these parents.

I used website builder WIX. Com to create my website. The name of my website is How can students benefit from Chinese immersion schools? The links of my website is <https://lzheng01.wixsite.com/chineseimmersion>, I plan to publish this website on September 2018. From this website parents can learn information about the benefit of Chinese immersion schools from the following three areas: Chinese immersion school encourage students Chinese language skills, Chinese immersion school improve students academic success, Chinese immersion schools provide effective classroom learning environments. Parents will have a better understanding about what is immersion, why learn Chinese, and what are the Chinese immersion schools in Minnesota. We can also interact with each other on the question and comment area. For more information about Chinese immersion schools, they can go to my resources page to find videos and articles of others talk about Chinese immersion.
